

## **Anna Stenstam – Short Bio**

Anna Stenstam is CEO and co-founder of CR Competence and Honorary Doctor at the faculty of Engineering at Lund University. With CR she aims to make advanced methods and deep understanding available and applied for all companies, to provide Quality by Understanding. She has functioned as the ILO of European Infrastructure projects aiming to bridge the gap between academia and industry. Anna has also been part of the foundation and now on the third year running: Start-Up School for Scientific Service Companies with the aim of creating more companies like CR in Europe, a school currently coordinated from DESY. Anna is also on the steering committee for MyFab and in the external advisory board for NanoLund.
