Managing collaboration

IMP 2025

Learning from the past - interacting for the future

Multi-stakeholder achievements through collaboration

Anna Nilsson-Ehle

Ladder of complexity

safe, affordable, accessible and sustainable transport systems for all

Safe traffic

	Pre-crash	Crash	Post-crash
Driver			
Roadway			
Vehicle			

Haddons matrix

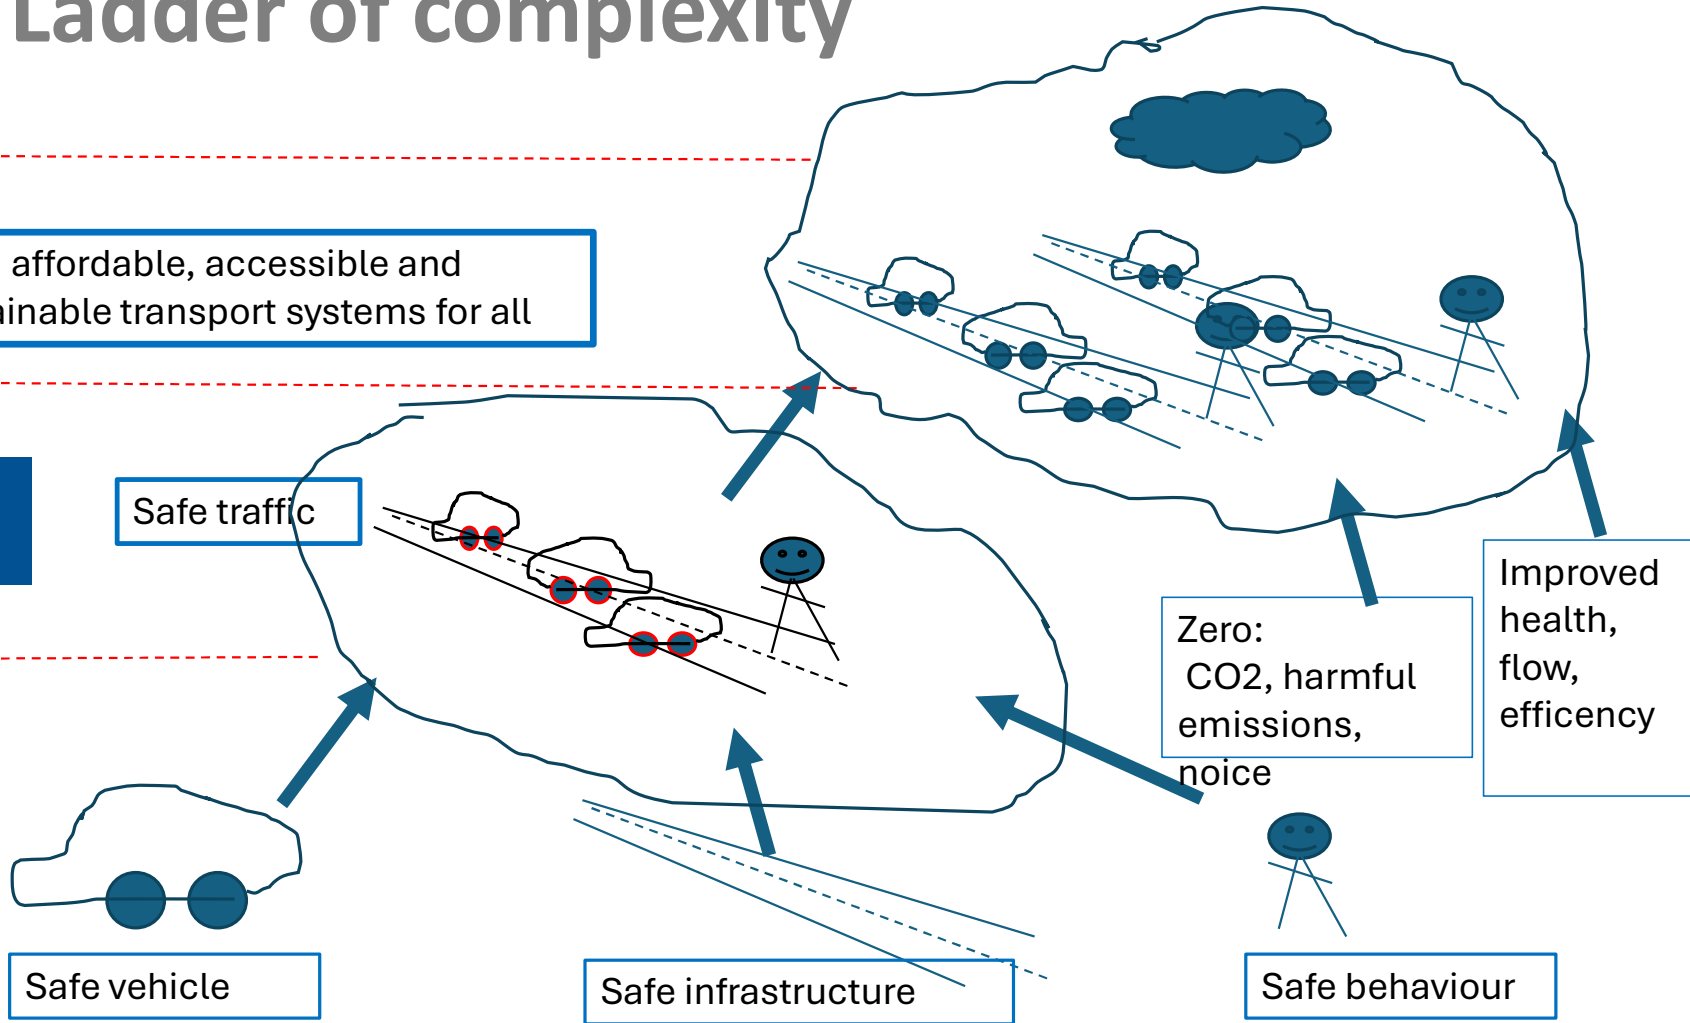

Safe vehicle

Safe infrastructure

Zero:
CO2, harmful
emissions,
noise

Safe behaviour

Improved health,
flow,
efficiency

Assumptions and questions

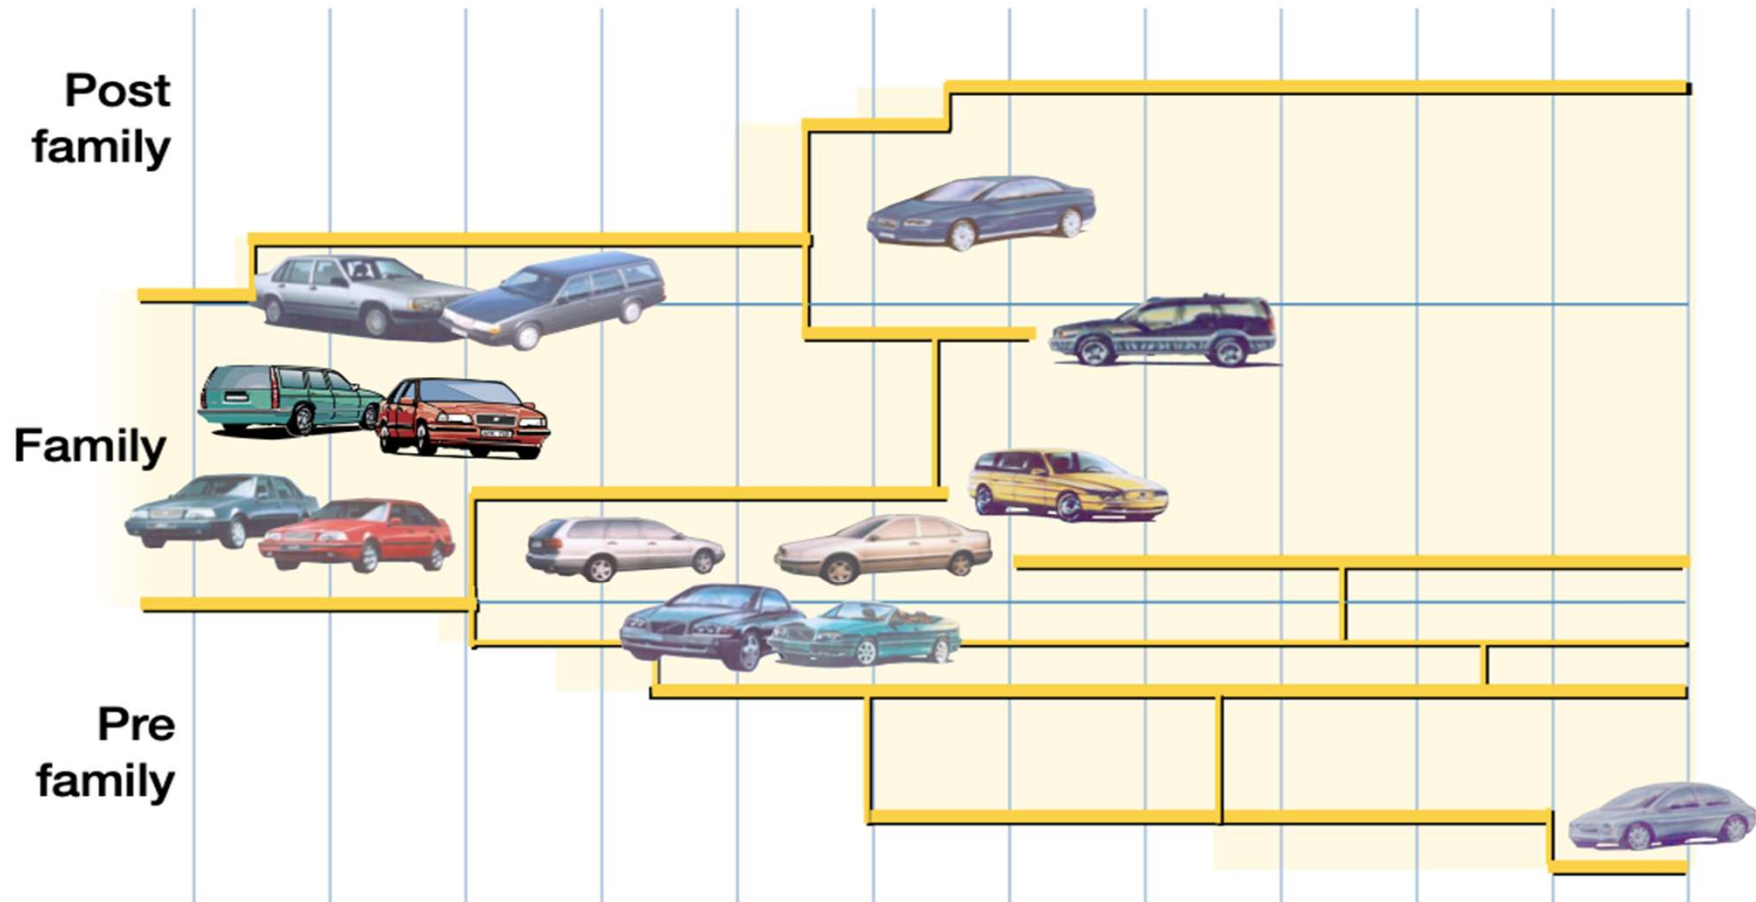

Systems collaboration is about stakeholders (or systems of systems) but still performed by individuals

Thus

It is plausible that teams of stakeholders are behaving as teams of individuals.
Is introducing AI tools and agents changing this?

Systems collaboration must address the multitude of stakeholders.
Is there a systems analogy to the top executives of an organisation?

A new Customer Product Strategy

There are 3 main components to the module team concept

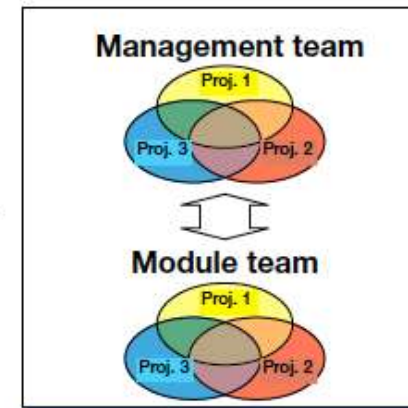

Development based on production modules

Development by cross-functional teams

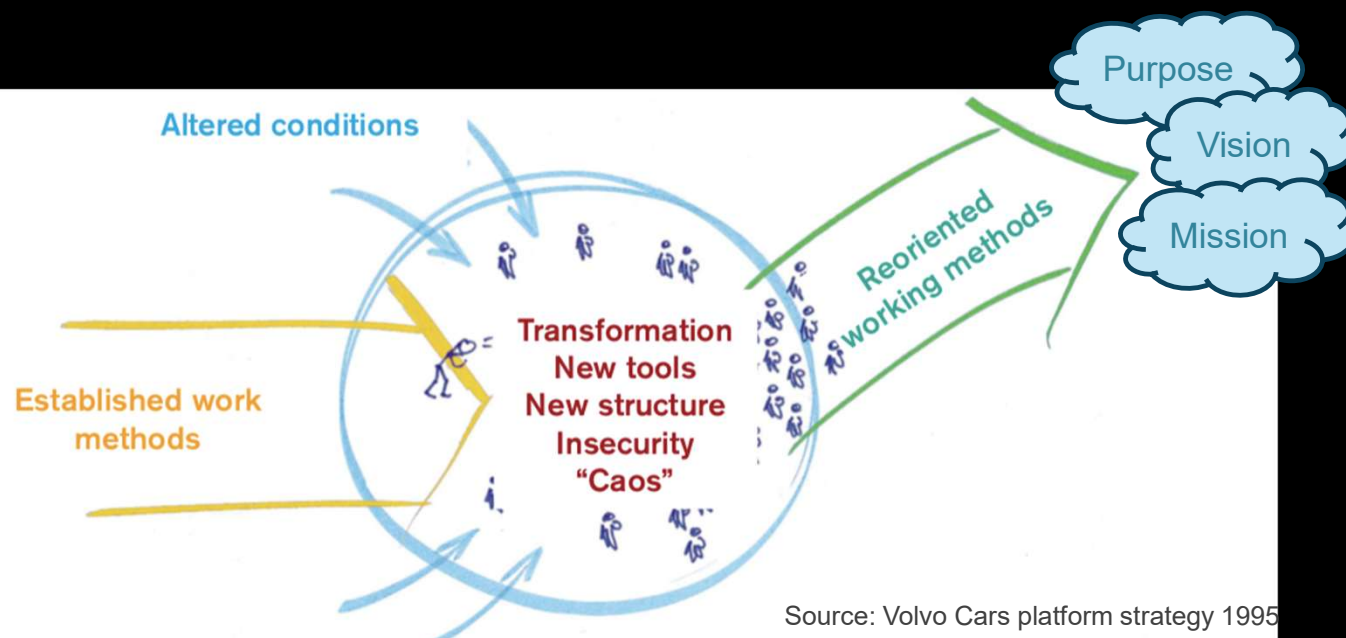

Common leadership for all projects on one platform

Cross-functional teamwork, IT, Office environment

A uniting idea on system transformation – a mission

Embrace complexity
Trust the process
Build trust
Show the direction
Visible experimentation

Nurturing spirit of collaboration

Reference: Ollila, S., & Yström, A. (2016). Anything goes? Conceptualizing different interaction strategies in open innovation. In *European Academy of Management Conference* in Paris France.

Key Factors for collaborative open innovation

- **Common high-level vision and values**
- **A few high-level measurable targets (for the centre performance)**
- **Shared view of true needs**
- **Trust in the benefit of multidisciplinary, global collaboration**
- **Accept complexity**
- **Bold partners, non-prestigious and persistent**
- **Dependency and desire to collaborate**
- **Integrity and respect for each other**
- **Identity – neutral and valued**
- **Embedded tensions**

SAFER success stories

Safest Car
on the
Market

"Volvo Cars acknowledges **the collaborative research** within SAFER as one important contributor to the recent recognition of their newest model Volvo XC90 which was awarded five stars and achieved top ratings in its 2015 Euro NCAP test" From SAFER 10 year report

In addition, a wide range of players are engaged through our round tables, projects and events
