

EXPLORE THE LATEST IN TRAVEL MEDICINE AT OUR BOOTH AND EDUCATIONAL NURSE SYMPOSIUM

WEDNESDAY MAY 22ND • 19:30 • PIERROT

The Differences in Travel Medicine Service Provision Across Countries

As globalization offers us more opportunities to travel the world, it can also bring management challenges when determining the best advice to offer your patients, with guidelines and recommendations often varying. Join our experts in tropical disease and preventative medicine to discuss the differences in local travel medicine service provisions and explore how you can give the right pre-travel advice to your patients.

Speakers

- **Susanne Malmstrøm**
Consultation Nurse in General
Medical Practice,
Roskilde, Denmark
- **Lisbet Krause Knudsen**
Nurse, Infection Epidemiology and
Prevention / Children's Vaccination
Programme, Statens Serum Institut,
Copenhagen, Denmark

Chikungunya poses a **global health threat**,
with cases predicted to rise dramatically.

EXPLORE THE LATEST IN TRAVEL MEDICINE AT OUR BOOTH AND EDUCATIONAL NURSE SYMPOSIUM

FRIDAY MAY 24TH • 12:45-13:30 • CONGRESS HALL

Warming Planet, Rising Risks: Escalating Threats of Arboviruses in Europe

Global warming is affecting climate suitability for arbovirus vectors, causing them to emerge in new regions and changing patterns of disease in recent years. As the threat of arbovirus spreads to new territories, associated diseases pose a significant and rising challenge for public health. Join our panel discussion to explore how climate change is impacting arbovirus transmission patterns and understand the increasing threat of these diseases in Europe.

Panelists

• **Dr Francesca Norman**

Physician specializing in Imported Infectious Diseases, Spain

Dr Norman will be providing a background on chikungunya disease, discussing the main clinical manifestations and challenges in the diagnosis of this infection.

• **Dr Sarah McGuinness**

Infectious Diseases Physician and Researcher, Australia

Dr McGuinness will discuss the changing distribution and demographics of Japanese encephalitis, with insights from the recent outbreak in Australia.

• **Dr Ralph Huits**

Infectious Diseases Physician and Researcher, Italy

Dr Huits will discuss the relevance of arbovirus vector biology for the increasing risks of human arbovirus disease outbreaks in Europe.

Moderated by **Jacqui Thornton**, award-winning health journalist
